

PA File Sight

Datasheet | Power Admin

PA

**File
SIGHT**

Simple

Track and audit file creation, changes and deletion through a simplified dashboard

Invisible

Designed to perform file auditing without slowing down the server

Insightful

Establish file auditing procedures as required by regulatory agencies

Introduction

PA File Sight enables you to see who is reading from and writing to important files on your server. It can tell you when a new file or folder is created, renamed, read from or written to. And when a file gets deleted, PA File Sight can tell you who did it and often what program they used.

PA File Sight offers superior performance and functionality with a sleek new design, and an advanced automated reporting system with adjustable parameters. The PA File Sight driver uses significantly less memory than its competitors or earlier versions to further reduce its monitoring load.

PA File Sight's active file and folder auditing can be an important part of meeting regulatory standards such as Sarbanes-Oxley, ISO and the Payment Card Industry Data Security Standard.

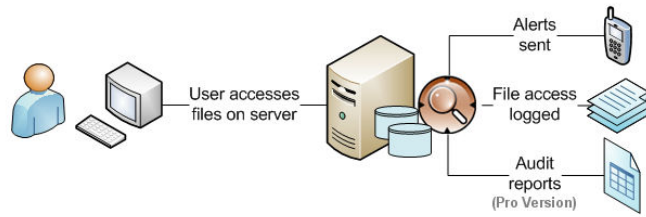

With the built in security settings, managers will know if files are tampered with, deleted, or being read by those who shouldn't have access.

PA File Sight is rich with features and functions Power Admin customers have grown to depend on for their file auditing needs. See for yourself why companies around the globe choose PA File Sight as their file auditing software of choice.

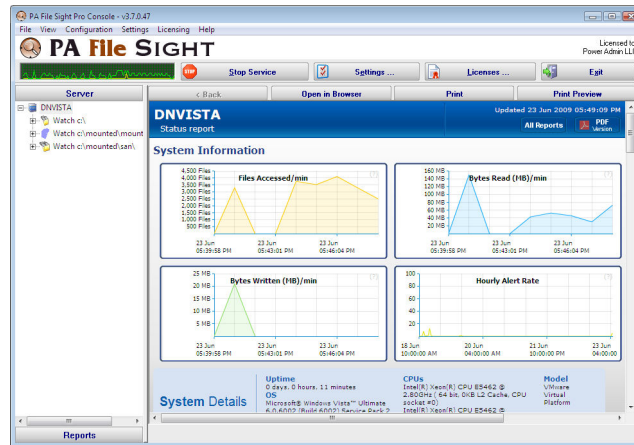

REVIEWS

“We passed [the audit]. And we were able to pass because of the work you did [on PA File Sight]. Thank you very much.”
– Network Administrator
RevTrak, Inc., USA

“I must compliment you on your excellent customer service and technical support. Keep up the good work and I'll remain a customer for a long time!”
– IT Manager
Cornell University, USA

PA File Sight seamlessly audits files from multiple stations and alerts managers when set parameters are breached. Users can set automated alerting systems to deliver reports in PDF format for simplified report sharing.

PA File Sight features advanced reporting tools and visuals to help IT managers perform detailed file auditing. Offering more than just a sleek dashboard, PA File Sight runs as an independent program; not relying on other auditing systems to generate data.

Benefits

- **Quicker setup** PA File Sight can be installed and configured in under two-minutes; designed for today's busy IT managers.
- **Automated startup** Begin auditing files without the need to login or manually initiate each auditing session.
- **Invisible operations** PA File Sight is equipped with resource usage throttling, allowing for file auditing that will not slow down the network or server.
- **Quicker report generation** PA File Sight generates full audit reports in seconds instead of minutes, reducing your wait time and streamlining operations.
- **Advanced reporting** Schedule reports to be generated automatically with an optional URL emailed to you.

About

Power Admin, LLC has been building professional grade system monitoring products for many years. Our products are used by Fortune 500 companies, government entities and educational institutions around the world. Our flagship product, PA Server Monitor, is loved by users and is touted as one of the easiest to use monitoring systems in its class.

All Power Admin products are designed by IT professionals who understand the frustrations of working with sub-par software which fail to meet expectations. Power Admin promises to offer only quality, reliable software after it has been fully tested in the field by IT professionals.
