Testimonials

“ We passed the audit! And **we were able to pass** because of the work you did on PA File Sight.

Thank you very much.”

-Network Admin
RevTrak, Inc, USA

“ I must compliment you on your **excellent customer service and technical support**. Keep up the good work and I'll remain a customer for a long time!”

- IT Manager
Cornell University, USA

Simple

Track and audit file creation, changes and deletion through a simplified dashboard.

Invisible

Designed to perform file auditing without slowing down the server.

Insightful

Establish file auditing procedures as required by regulatory agencies.

Features

Monitors File & Directory:

- Creates
- Deletes
- Reads (accesses)
- Writes (changes)
- Permissions

Alert Details:

- User IP address and computer name
- User account, including domain
- Target file and folder
- Activity that was done to the file (read, write, delete...)
- Date and time of action

Introduction

PA File Sight™ enables you to see who is reading from and writing to important files on your server. It can tell you when a new file or folder is created, renamed, read from or written to. And when a file gets deleted, PA File Sight can tell you who did it, their IP address, computer name, and often what program they used.

PA File Sight's active file and folder auditing can be an important part of meeting regulatory standards such as HIPAA, Sarbanes-Oxley, ISO and the Payment Card Industry Data Security Standard (PCI-DSS).

See for yourself why companies around the globe choose PA File Sight as their file auditing software of choice.

Testimonials

“Very happy with the app so far, it blows away [a major competitor].”

—Sandy H.
Family Insurance

“We appreciate all your **hard work and dedication** to getting the problem resolved. Wish more companies had the support that you guys offer.”

— Todd W.
Beasley Allen, USA

Benefits

- **Quick setup:** PA File Sight can be installed and configured in less than two minutes; designed for today's busy IT managers.
- **Automated startup:** Begin auditing files without the need to login or manually initiate each auditing session.
- **Invisible Operations:** PA File Sight is equipped with resource usage throttling, allowing for file auditing that will not slow down the network or server.
- **Quick report generation:** PA File Sight generates full audit reports in seconds instead of minutes, reducing wait time and streamlining operations.
- **Advanced reporting:** Schedule reports to be generated automatically with an optional URL emailed to you.

PA File Sight seamlessly audits files from multiple stations & alerts managers when set parameters are breached. Users can set automated delivery of PDF reports for simplified report sharing.

PA File Sight features advanced reporting tools and visual graphs and charts to help IT managers perform detailed file auditing.

PA File Sight does not require Windows auditing or any other auditing systems to generate data. This helps ensure great server performance.

About

Power Admin, LLC has been building professional grade system monitoring products for many years. Our products are used by Fortune 500 companies, government entities and educational institutions around the world.

All Power Admin products are designed by IT professionals who understand the frustrations of working with sub-par software that fails to meet expectations. Power Admin promises to offer only quality, reliable software after it has been fully tested in the field by IT professionals.
